

Profile

Results driven software architect and full stack engineer specializing in enterprise level web applications with a focus on great user experiences and forward thinking design. Experienced with leading agile development teams and fostering a high performance culture.

Skills

Web Development

Building enterprise-grade web applications at any level of the stack that ensures scalability, reliability and performance.

User Experience

Passionate about creating engaging user experiences with beautiful front-ends. A developer with an eye for design.

Project Management

Proven ability to lead agile development projects utilizing kanban for predictable and continuous delivery.

Technologies

These are just some of my favorite technologies and area of expertise

Front-End	Back-End	Other
Angular	Node.js	Ionic / Cordova
Ember	C# / .NET	Objective-C
Knockout	PHP	PostgreSQL
Bootstrap	Ruby	MySQL
jQuery	Java	Mongodb

Experience

Ultimate Software, Inc.

Feb. 2015 - Present

Technical User Experience Designer

- Work with modern front-end technologies to produce interactive prototypes capable of simulating user flows and support usability engineering studies.
- Collaborate with UX designers, business managers, software engineers, researchers and architects to enable the design process, encourage productive dialog, and help the design team solve technical design problems as they arise.
- Contribute toward the establishment and documentation of UX/UI patterns in the company style guide, while evangelizing best practices for front-end development across the development teams.

Ultimate Software, Inc.
